Subject: ***External E-Mail*** 112312- Asbestos property assessment update 2019-12-17

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and their e-mail address and know the content is safe.

All,

Please see below for an update regarding asbestos property assessments conducted between December 1, 2019 and December 16, 2019, and laboratory reports received as of December 17, 2019.

- To date, CTEH has conducted 90 (4 industrial/commercial and 86 residential) property sampling assessments.
- To date, CTEH has collected 155 bulk samples and 197 wipe samples for asbestos analysis from 86 property sampling assessments.
- To date, laboratory analysis results have been received for 235 bulk samples and 184 wipes samples. In some cases, samples may have been analyzed multiple times.
- To date, out of 235 bulk samples, 96 detections of asbestos type have been reported with a range of detections between 2 – 55 %.
- To date, out of 184 wipe samples, there have been no detections of asbestos above the method detection limit of 2.99 asbestos structures

Let me know if you have any questions,

Dana Szymkowicz, Ph.D.
